WHITE NURSERIES

Phone Trumansburg 196-F-2

MECKLENBURG

NEW YORK

An Invitation

You are welcome at any time to drop in and see us.
 You may inspect at your leisure the gardens and
 borders we maintain for your pleasure and benefit.

We're glad to share the experience and "know how"
 of many years with you in solving your individual
 problems. Someone competent to answer your
 questions is on hand everyday 'til dark during
 planting season. May we suggest, to save us both
 time, that you bring a sketch or photograph
 with you.

We'd like to have you look over our new shade
 house, where we have the "cream of the crop" from
 the nursery for your inspection and selection.

We think we can convince you that we have as
 quick, convenient and friendly service as money
 can buy!

Vines & Groundcovers	10

WHO WE ARE

WHITE NURSERIES are the largest service type nursery in central New York State. We firmly believe we have more to offer you for your money in variety, service and quality. We have been growing our own stock since 1935. We are members of the Western New York, the New York State, and the American Association of Nurserymen, and subscribe to their code of ethics. We are a neighborhood nursery, able to offer you intelligent planning service, experienced comment on types of soil, hardiness and other factors affecting plant growth which cannot be obtained from distant sources.

WHERE WE ARE

WHITE NURSERIES are located in the village of Mecklenburg, Schuyler County, ten miles west of Ithaca on Route 79. A sign will direct you.

WHAT WE DO

We propagate and grow all of our materials on some forty acres of typical stiff clay at an elevation of 1200 feet. Our plants are grown in open fields without benefit of protection and chemical fertilizers. We know that any plant you purchase has ruggedness grown into it through its survival under nursery conditions. We maintain experienced and responsible landscape crews, available at any time to assist you in planting, construction of walks, flagstone terraces, walls, pools and the like. We are able to feed, prune or remove large trees.

WE GUARANTEE

All plant materials are guaranteed true to name, and to be live and healthy at time of sale. Any materials failing will be replaced at one half the billed cost, excepting should failure result from causes over which we have no control. We hold certificate 2716 from the Bureau of Agriculture and markets of the State of New York, attesting to the fact that our nursery is pest and disease free.

DELIVERY

During planting seasons our trucks pass most points within a twenty mile radius of Ithaca. Deliveries will be made without charge when incorporated in our regular trips. Express or Freight shipments will be packed without charge on orders in excess of \$10. A nominal charge will be made, based on mileage, for long-distance deliveries. We can arrange to dig and deliver your order over a series of week-ends, should you so desire.

CONCERNING THIS LIST

The list following is designed to acquaint you with the many varieties we grow. We have eliminated lavish illustrations and descriptions, for we feel that a visit to the nursery where you may see the plant in question is much more satisfactory for all concerned.

If unable to visit us, we suggest checking with any of L. H. Bailey's or A. C. Hottes' books for unbiased descriptions. The grounds of the nursery office are simply landscaped with typical specimens of many varieties, and you may see just how they would look on your own property.

If you don't find a plant listed, it may be that we have discarded it from stock because we found it took too much pampering and maintenance under local conditions. We do not, for example, grow nor list any of the Irish juniper types, California privet or Retinosporas for the simple reason that in the long run they are unsatisfactory in this locality. If you don't find it listed, ask us why. We might be able to get it for you, or we may have it in quantities too small to list.

SHADE HOUSE

This year for your convenience we have a new 30 x 100 foot Shade House. In this area we have temporarily "heeled in" or planted in sawdust and peat moss representative sizes of most everything we grow. The plants are priced individually, and you may make your selection from them without the time-consuming, and often muddy, trip through the nursery. Perennials and bulbs are handled in individual flats. Your selections may then be loaded directly into your car, or tagged for later delivery. This system of handling assures you of personally-selected, freshly-dug plants in perfect condition without waiting and delay.

"BARGAIN BASEMENT"

A section of the Shade House is devoted to real bargains. These are odd lots of plants left over in digging or planting a block or field of the nursery, single "unmatched" plants, or plants not up to our usual standards. All are perfectly live and healthy, but are just "odds and ends" in odd sizes and quantity. Needless to say, the contents of the entire Shade House changes almost daily during the season.

GARDEN STORE

We have on display at the office all sorts of tools and gardening aids that we have proven practical in everyday use. Labels, Peat Moss, Sprays and Spray Equipment, Lawnmowers, Hedge Shears and the like.

EVERGREENS

All evergreens are "B&B", which means they are carefully dug with a compact ball of earth in which they grew, and then burlapped and tied to retain the original soil structure. Due to their growth habits, evergreens may be moved at any time ground conditions permit, except for a short period when they make rapid growth in June. With the exception of hemlock, all may be safely transplanted in the fall.

ARBORVITAE: AMERICAN (*Thuja occidentalis*)

Excellent as sheared hedge, as single specimen, or in foundation plantings needing height. Easily restricted to desired size by yearly shearing. Should only be planted in full sun.

ORNAMENTAL AND SHADE TREES

Prices quoted are for bare root plants, except where "B&B" is indicated, showing that balling and burlapping is included in price shown. We have available several dozen root pruned specimen elms, ash, maples and oaks in large sizes suitable for immediate effect. We have equipment to handle trees up to fifty feet in height. Price depends upon specimen selected, and conditions at site of planting. We will be glad to give you quotations.

We will be happy to help you plan your perennial bed, or make up special collections for your specific needs.

BULBS

We have planted by the dozen in flats some of our best Holland Tulips, Iris, Hyacinths and Narcissus. These can be moved any time during the spring for immediate effect. They are all named varieties and reasonably priced.

EACH FALL WE IMPORT DIRECTLY FROM HOLLAND. We have planted for display in the nursery what we have found to be the best tulips, lillies, crocus and daffodils adapted to our soils and weather. A most satisfactory way to purchase your bulbs is to inspect this display, make your own selection, and leave an order for later delivery. In this way you see exactly how the plant looks, how it grows, and how it could fit into your own garden.

SOIL CONDITIONERS AND FERTILIZERS

Time, plant materials and money are wasted on poor, compacted, clayey soils. It is for cheaper to "make" good soil from what you have than to buy "top-soil". We suggest addition of coal ashes, sand or cinders and organic matter.

"Compeet" is a compost of our own manufacture. It is well-rotted organic matter broken down and granulated with a power shredder. 100% organic matter.

Per bushel .75
Per cubic yard, delivered 8.50

"PREMIER" PEAT MOSS

The best quality peat moss we can buy. Finely pulverized.

Standard Wood Veneer Bale 18" x 14" x 30"

At the nursery 4.25
Delivered 4.75

Cub Bale - In 5-ply Kraft Paper Easy to handle and move.

10 oz. refill cartridge .75

BLACK LEAF 40

Nicotine Sulphate concentrate

Per ounce .50

GARDEN TOOLS AND ACCESSORIES

ECLIPSE LAWNMOWERS

Made by the world's largest producers of power mowers. Precision made, built to last. We'd be glad to show them to you.

Eclipse Hand Mowers

Vogue - 16" cut 24.00
Zephyr - 16" cut 26.50
Zephyr - 18" cut 28.00
L- 18" cut 32.50

Eclipse Power Mowers

Rocket - 20" 137.50
Parkhound - 21" 172.50
Rolloway - 25" 275.00

HUDSON CART SPRAYER

An ideal 5-gallon, all brass spray outfit for 2,4-D use. Has 8" rubber-tired wheels, 3-nozzle spray boom.

21.50

OUTDOOR OVEN FIREPLACE

A ready-made, well-built unit around which you can easily build your own cooking unit. Complete directions included. Delivered within our area.

34.50

SPLIT CEDAR OR POST AND RAIL FENCING BY ELHIDE

We can furnish this in almost any height or spacing you wish. Custom made to your specifications, delivery within 10 days to two weeks. We'll be glad to quote you and show you samples.

HEDGSHEAR - Electric hedge trimmers by Porter-Cable of Syracuse.

The only electric shear with an endless chain cutting action, making cuts on both sides of blade. Free from all vibration.

39.95

FLAGSTONE

We normally have in stock first quality Pennsylvania flagging in random cut and trimmed pieces, stair treads, etc. We can have patterned terraces or designs cut to your specifications. Price varies with size, thickness, delivery, etc.

PLASTIC HOSE BY AMPECO OF CALIFORNIA

One third the weight of usual hose, kink and crack proof, patented all-brass couplings, with five year warrantee.

25 foot length 6.95
50 foot length 12.95

SOILSOAKER Porous Canvas Hose

Excellent for new plantings, borders and terraces. Allows water to seep into soil without washing.

30' section 3.50

At our office we have many additional garden helps such as labels, hand pruners and the like. We'd like to have you try them out, and get the "feel" of them yourself under actual working conditions. Only in this way will you know exactly what you are getting. We are glad to discuss your problems with you at any time, and you are welcome to all the advice you want without obligation.

If you are a "beginner" we strongly urge you to write to the Mailing Room, Roberts Hall, Cornell University, Ithaca, N.Y., for their list of available free publications on horticulture.

We are "sold" on the following DeLaMare garden books all by Alfred C. Hottes, former Ithacan and Cornellian. All are completely up-to-date, lavishly illustrated and give use, propagation and culture of the plants discussed.

We keep the following in stock at all times. (They make excellent practical

gifts, too!) We'll gift wrap and mail at no additional cost, if you wish.

The Book of Annuals 2.00
The Book of Perennials 3.00
The Book of Shrubs 3.00
The Book of Trees 4.00

We also recommend the following Macmillan books, which we stock.

"Herbs" by Clarkson. Fully describes uses, growth and propagation. 3.50
"Book of Bulbs" by Rockwell 4.00
"Garden Bulbs in Color" by McFarland 3.50

PLANTS FOR VARIOUS CONDITIONS
